52! is a very large number and represents the total number of different combinations of cards that can be created from a deck of 52 cards. To put this number in perspective, 52! is approximately 8.06×10^{67} , which is much larger than the estimated number of atoms in the observable universe (which is around 10^{80}).

How many combinations can a deck of 52 cards make? - Quora
